

Dear FCC:

I would like to express my full support for this proposal.

While the amateur community is largely self-policing, I have listened to kind attempts by

many amateurs to remedy this specific situation voluntarily to no avail.

And I am very encouraged

about the action to remedy the situation by bringing the 160m band in line with the ARRL band plan

whereby narrow-band modes are exclusively allowed below 1.843, leaving plenty of room for the wide-band

modes in the majority of the band above 1.843.

Please count on my full support for RM-10352. I believe it is necessary to obtain compliance and harmony

with minimum discord among the amateur community.

Respectfully,

David J. Schmocker, KJ9I
